SKILLS

- Languages: C, C++, Python, Java, SQL
- Libraries/Frameworks: NumPy, Pandas, Scikit-learn, Matplotlib, HTML, CSS, JavaScript
- Tools/Platforms: Git, GitHub, Google Colab, VS Code, Linux, Cisco Packet Tracer
- Soft Skills: Problem-Solving, Team Player, Adaptability

PROJECTS

Skill Gap Analyzer | [GitHub](#): Aug 2026

- Built an AI-powered application that analyzes users' existing skills against career goals, identifies skill gaps, and provides structured insights for targeted improvement.
- Engineered a FastAPI backend with RESTful API endpoints to process user inputs, handle skill-analysis requests, and return structured results efficiently.
- Integrated Google Gemini to generate contextual skill-gap insights and personalized recommendations based on users' career objectives and existing skill sets.

Tech: Python, FastAPI, Google Gemini, HTML, CSS

Intelligent Crop Advisory System | [GitHub](#): Apr 2026

- Designed a machine-learning agricultural advisory system integrating crop, fertilizer, disease detection, and yield prediction.
- Implemented machine-learning models using Scikit-learn and TensorFlow/Keras for crop and fertilizer recommendations, plant-disease detection, and agricultural prediction tasks.
- Visualized agricultural insights through an interactive Streamlit interface with Plotly visualizations.

Tech: Python, Scikit-learn, TensorFlow/Keras, Streamlit

Pokemon Pokedex | [GitHub](#): Oct 2024

- Constructed a responsive and interactive Pokédex website that allows users to explore detailed Pokémon information with simple navigation and an engaging browsing experience.
- Enabled users to explore Pokémon types, abilities, statistics, and moves through JavaScript-powered interactive features with structured HTML and dynamic client-side functionality.
- Deployed the completed application using GitHub Pages after integrating HTML, CSS, and JavaScript, demonstrating practical experience in responsive front-end development and web deployment.

Tech: HTML, CSS, JavaScript

TRAINING

AI Engineer Launchpad: Mastering LLMs and Agentic AI | LPU | [Certificate](#): Jun 2026 – Jul 2026

- Completed a summer training program focused on Large Language Models (LLMs), Generative AI, and modern AI application development.
- Learn prompt engineering, LLM integration, and AI-assisted application development using tools and frameworks for Generative AI.
- Explored Agentic AI concepts, including AI agents, task automation, tool usage, and building intelligent workflows with LLMs.

CERTIFICATES

- Oracle Cloud Infrastructure Certified AI Foundations Associate | Oracle | [Certificate](#) Sep 2026
- Python with Libraries | Skillera | [Certificate](#) Mar 2025
- Programming Using C++ | Infosys SpringBoard | [Certificate](#) Jan 2025
- Effective Time Management | Master Union Code | [Certificate](#) Oct 2024
- Code Chef | Deanery of Science | [Certificate](#) Aug 2023

CO-CURRICULAR ACTIVITES

- Participated in the Algo-N-Hunt Competition | Google Student Ambassador Program | [Certificate](#) Nov 2025
- Competed in the Dev Drive Hackathon among 200+ participants| Dev Drive | [Certificate](#) Sep 2024

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 7.87 Aug 2024 - Present

Army Public School Bengdubi Siliguri, West Bengal
Intermediate; Percentage: 71.6% Apr 2022 - Mar 2024

Army Public School Bengdubi Siliguri, West Bengal
Matriculation; Percentage: 84.2% Apr 2014 - Mar 2022
