SKILLS

• Languages:	C, C++, Python, Java, SQL
• Libraries/Frameworks:	NumPy, Pandas, Scikit-learn, Matplotlib, HTML, CSS, JavaScript
• Tools/Platforms:	Git, GitHub, Google Colab, VS Code, Linux, Cisco Packet Tracer
• Soft Skills:	Problem-Solving Skills, Team Player, Adaptability

PROJECTS

Skill Gap Analyzer GitHub:	Aug 2026
- Built an AI-powered application that analyzes users' existing skills against their career goals and identifies relevant skill gaps. The system provides structured insights to help users understand which skills they need to improve. - Engineered a FastAPI backend with API endpoints for handling user inputs, processing skill-analysis requests, and returning structured results. This provides a clear communication layer between the application interface and analysis logic. - Integrated Google Gemini to generate AI-assisted skill-gap insights and personalized recommendations. The integration enables the system to provide contextual suggestions based on the user's career objectives and existing skill set.	
Tech: Python, FastAPI, Google Gemini, HTML, CSS	
Intelligent Crop Advisory System GitHub:	Apr 2026
- Designed a machine-learning-based agricultural advisory system that combines crop recommendation, fertilizer recommendation, plant-disease detection, and yield prediction. The system provides multiple forms of agricultural guidance within a unified application. - Implemented machine-learning models for crop and fertilizer recommendations and incorporated TensorFlow/Keras for plant-disease detection. These modules process agricultural inputs and provide predictions to support data-driven decision-making. - Visualized agricultural predictions and insights through an interactive Streamlit interface with Plotly-based visualizations. The interface brings the different advisory modules together into an accessible application.	
Tech: Python, Scikit-learn, TensorFlow/Keras, Streamlit	
Pokemon Pokedex GitHub:	Oct 2024
- Constructed a responsive and interactive Pokédex website that allows users to explore detailed Pokémon information. The interface was designed to provide simple navigation and an engaging browsing experience. - Enabled users to explore Pokémon types, abilities, statistics, and moves through JavaScript-powered interactive features. The implementation combines structured HTML content with dynamic client-side functionality. - Deployed the completed application using GitHub Pages after integrating HTML, CSS, and JavaScript components. The project demonstrates practical experience in responsive front-end development and web deployment.	
Tech: HTML, CSS, JavaScript	

CERTIFICATES

• Oracle Cloud Infrastructure Certified AI Foundations Associate Oracle Certificate	Sep 2026
• AI Engineer Launchpad: Mastering LLMs and Agentic AI Certificate	Aug 2026
• Python with Libraries Skillera Certificate	Mar 2025
• Programming Using C++ Infosys SpringBoard Certificate	Jan 2025
• Effective Time Management Master Union Code Certificate	Oct 2024
• Code Chef Deanery of Science Certificate	Aug 2023

CO-CURRICULAR ACTIVITES

• Competed in Algo-N-Hunt Google Student Ambassador Program Certificate	Nov 2025
• Participated in a Hackathon Among 200+ Certificate	Sep 2024

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 7.87	August 2024 - Present
Army Public School Bengdubi	Siliguri, West Bengal
Intermediate; Percentage: 71.6%	April 2022 - March 2024
Army Public School Bengdubi	Siliguri, West
Bengal	
Matriculation; Percentage: 84.2%	April 2014 - March 2022
